

Low GI (Glycaemic Index)

Primera™ Red Rice, known as UKMRC9, has a low glycaemic index value (41 - 48%) which helps to lower and stabilize your after-meal blood glucose level.

High Antioxidant

The anthocyanins in Primera™ which give red colour to the rice serve as good source of antioxidants, providing a healthy wholegrain option where rice is a staple food.

Palatable Taste

Primera™ has a slightly nutty flavour and pleasant to taste.

Feeling Satiated

Eating Primera™ red rice makes you feel satiated and not hungry fast.

Healthier than White Rice

Anthocyanin (78mg/100g)

Vitamins (1.5 to 5.7x higher)

Minerals (1.8 to 5.7x higher)

Folate (2.5x higher)

Fibre (2.7x higher)

Proteins (1.1x higher)
